

## New SSL Anyconnect VPN Client Instructions

The SSL Anyconnect VPN client works with 32 and 64 bit Windows PCs as well as Mac OS X Computers.

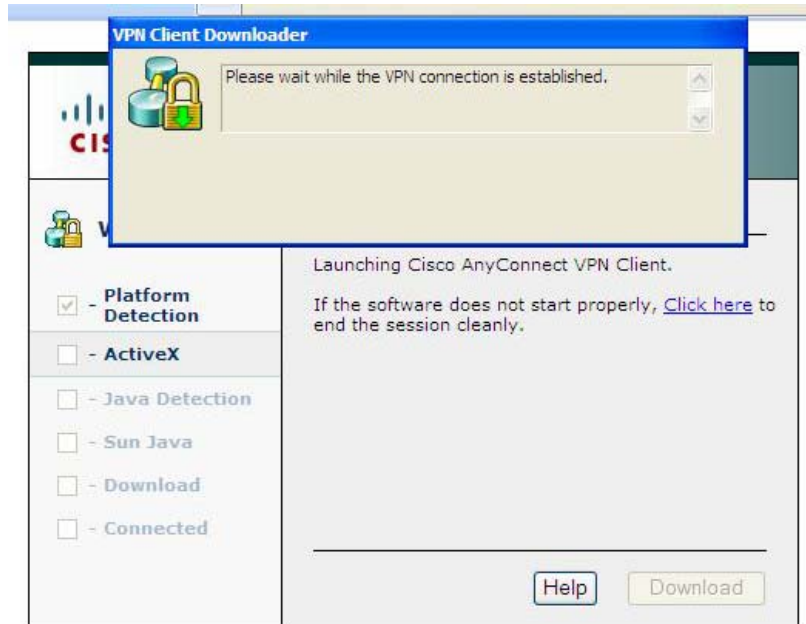

Open your favorite web browser and type in <https://pinky.vai.org/>

Enter in your VAI username and password and click Login.

A screenshot of a "Login" form. The title bar says "Login". Below the title bar, it says "Please enter your username and password." There are three input fields: "GROUP:" with a dropdown menu showing "sslclient", "USERNAME:" with a text box, and "PASSWORD:" with a text box. Below the fields is a "Login" button.

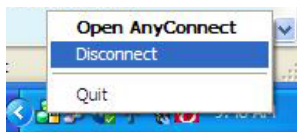

If this is your first time using the SSL Anyconnect client, it will download and install automatically. Click "Yes" or "Install" on any popups, this will install the necessary certificates.

You will see this icon in your task bar to show when you are connected. At this point you can access any VAI resources you wish; email, shared folders, etc...

When you want to disconnect, right click the  icon in the task bar and click Disconnect.

You only need to download the client once. Anytime going forward, all you need to do is start the SSL Anyconnect client from the Start => Programs => Cisco => Cisco AnyConnect VPN Client.
