

High School Journal Club

Teachers

Grades 9-12

Analyze science literature and present findings.

Investigate and perform own investigation, using the model organism, *Daphnia*.

Learn from science professionals about career opportunities.

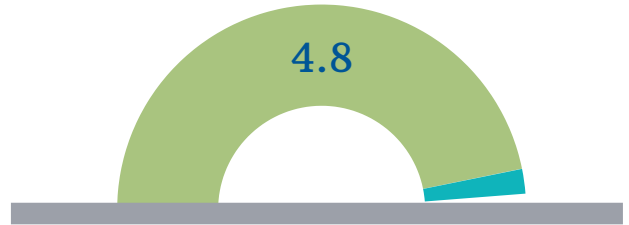

Schools Represented

- Forest Hills Eastern High School
- Forest Hills Northern High School
- GRPS City High Middle School
- Grand Rapids Catholic Central High School
- KISD- Health Science Early College Academy
- Lowell High School
- Sussex Tech High School (Delaware)

Overall Rating

My students...

What are 2-3 big ideas that you are taking away from your HSJC experience?

"Awareness of new science careers is important for students as they decide how they would like to continue their education and start careers. My students become aware of several interesting careers in science just by talking to peers from other schools, other teachers, and by listening to postdocs discuss their research."

"You can do hard things with practice. You don't have to know exactly what you want to do, coming out of high school. Hard work creates ample opportunities."

My students gains in understanding...
