Core technologies and services are an integral part of today's **biomedical research** landscape and increasingly require dedicated expertise as new methods become more specialized. Shared core facilities provide access to these **cutting-edge technologies** and **expert services**, ultimately enhancing groundbreaking research in a resource-friendly manner.

Hosted by Van Andel Research Institute, *Core Technologies and Services: Enhancing Science in West Michigan* will explore available core resources in the region and will bring together scientists from across West and Mid-Michigan to foster new collaborations. The one-day symposium will feature a keynote presentation by physician-scientist Patrick Grohar, M.D., Ph.D., of Van Andel Research Institute and Spectrum Health Helen DeVos Children's Hospital, as well as talks by core leadership and panel discussions.

KEYNOTE SPEAKER

Patrick Grohar, M.D., Ph.D.

*Associate Professor, Center for Cancer and Cell Biology,
Van Andel Research Institute*

*Pediatric Oncologist,
Spectrum Health Helen DeVos Children's Hospital*
